730145B Water Jump Barrier Seal Instructions

Cross section A-A

Place bolt (M2590) so the head sits on flat side of grooved plate (M862).

Match grooves in plate to grooves in top of aluminum plank and slide in from the side.

Align bolt with the top hole in the gusset of the water jump.

Secure bolt with a washer (M2273) and a nylock hex nut (M1249).

Repeat process for all four (4) places. Secure both top portions and level before securing bottom portions.
